THE PROBLEM

INFINITI GLOBAL

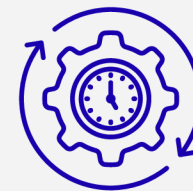

THE ISSUE

The U.S. organ transplant system's outdated tech and inefficiency cause preventable organ waste, while over 100,000 people wait for life-saving matches.

INEQUITY IN ORGAN ALLOCATION

There are geographic and segmented disparities in transplant access.

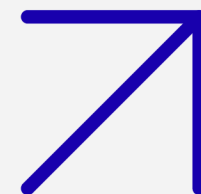

ORGAN NON-USE AND SYSTEM INEFFICIENCY

20% of organs from deceased U.S. donors go unused annually

OUTDATED TECHNOLOGY AND OVERSIGHT ISSUES

Roughly **\$55 billion** is spent by Medicare on patients.

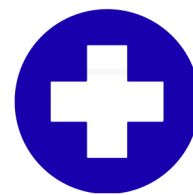

INNOVATION

THE SOLUTION

Our intelligence solution helps the human organ transplant system with coordination, logistics, tracking, and streamlining processes to reduce preventable organ waste.

CLIENTS & BENEFITS

MEDICAL PARTNERS

OPO, OPTNs, Hospitals, Service Providers

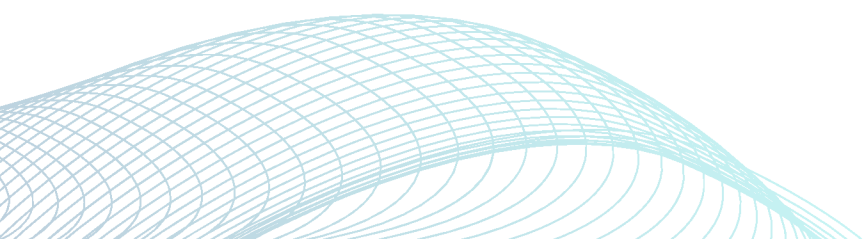

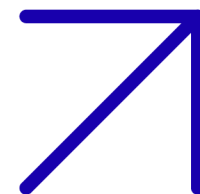

GOVERNMENT

SBA 8(a) organization, HRSA partnership, OPTNs

DIRECT TO CONSUMER

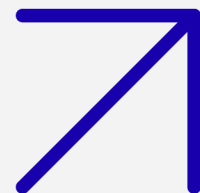

The 360 approach-Patient Communication & Tracking

WHY NOW?

The transplant ecosystem is moving towards...

- **Modernization**
- **New Vendor Opportunities**
- **Pressure for more transparency**
- **Demand for better Coordination**

CHANGES IN THE MARKET

A perfect storm of federal intervention, regulatory pressure, and technological shifts has opened the market.

REGULATORY CHANGES

- Due to new federal guidelines, OPOs are urgently buying tech and AI solutions.

GOVERNMENT INTERVENTION

- A **\$440M** federal shift is dismantling archaic legacy systems.

OUTDATED TECH

- Current technology is severely outdated, fragmented, and unreliable.

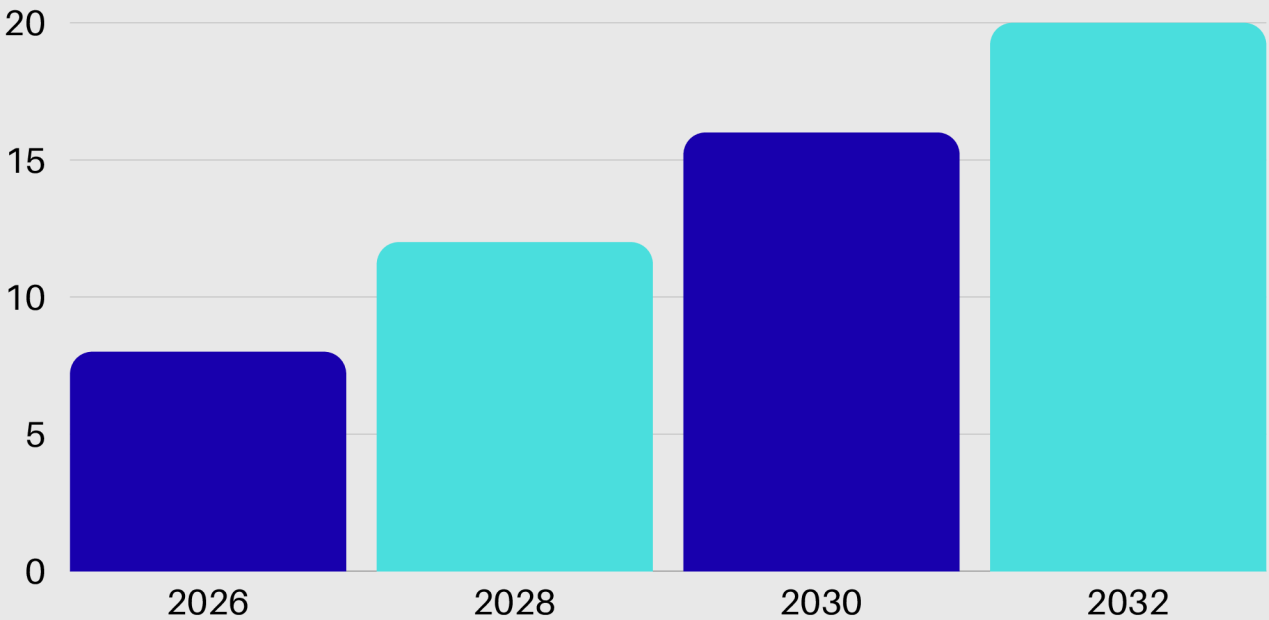

BROADER MARKET GROWTH

- **\$15B+** transplantation market with projected growth to past **\$30B** by the early 2030s.

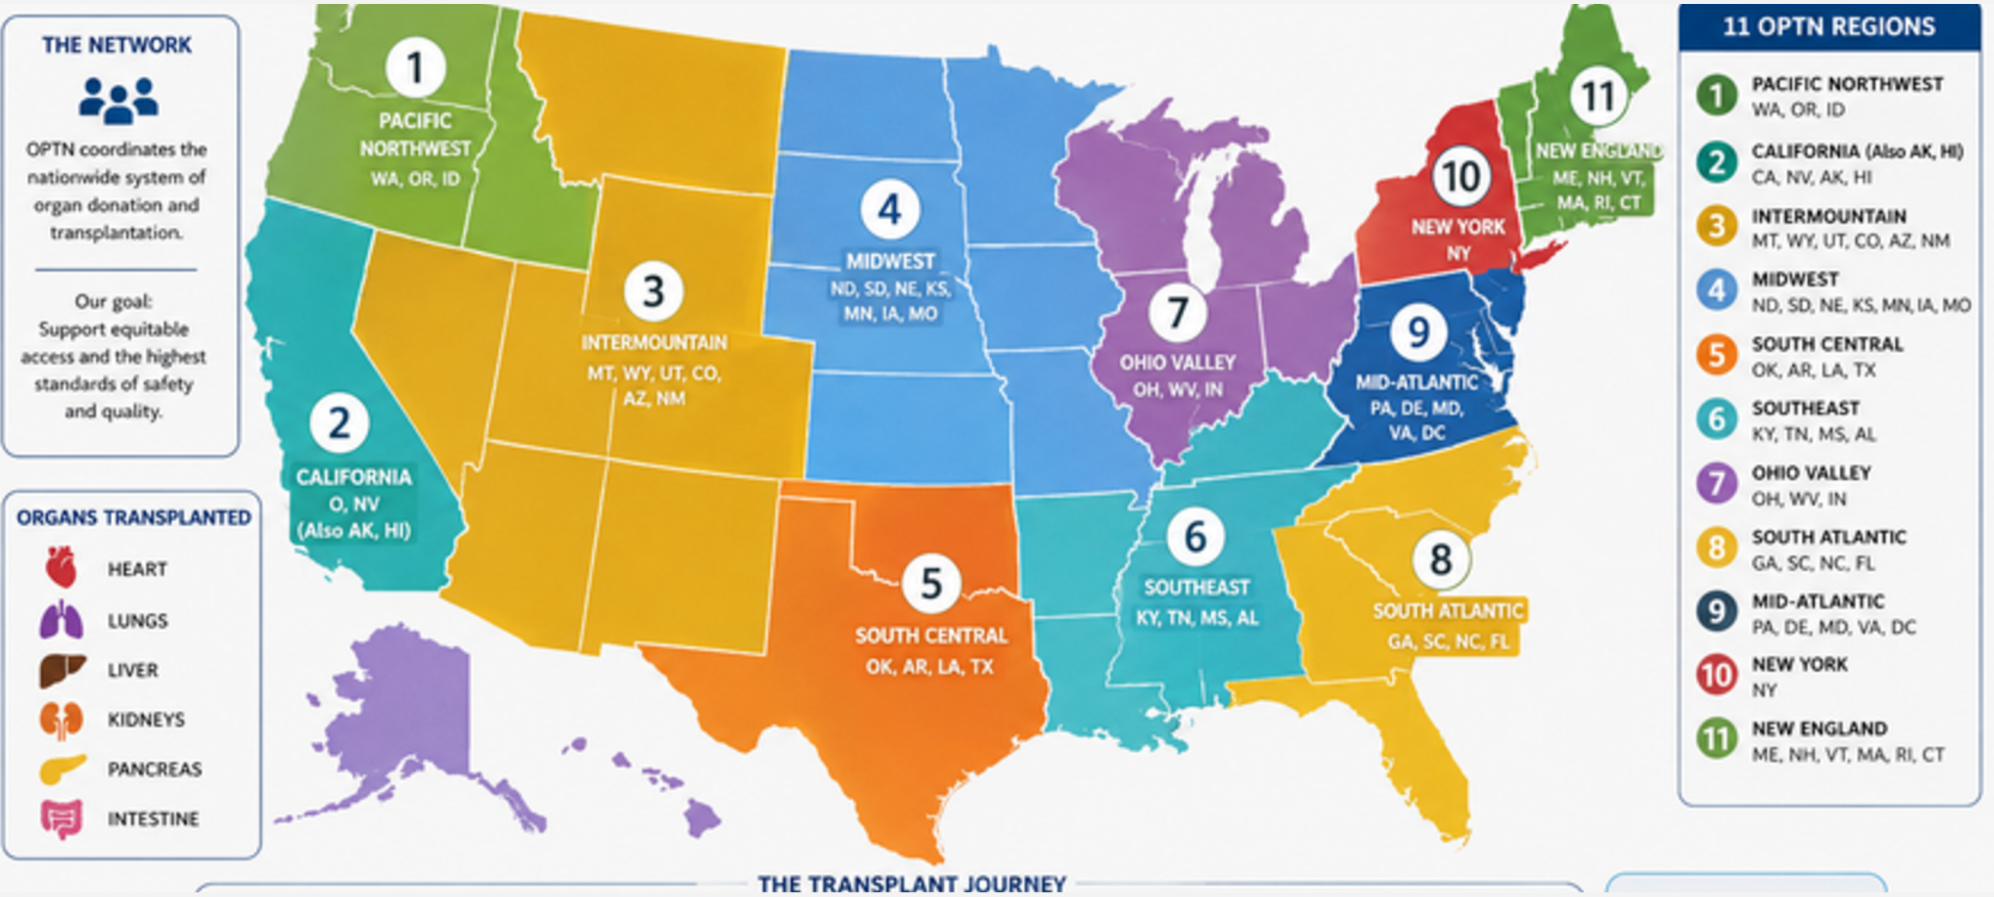

REGION | NATIONAL | INTERNATIONAL

BUSINESS MODEL

How do we make money?

Our market approach begins regionally, then nationally, and finally internationally.

Multi-Tiered Revenue Model

- Onboarding and Annual platform license fees
- Patient/Insurance Monitoring Fee

Private and Government Sectors

- HRSA/HHS Contracts
- Global Donor Data Service Contracts
- Usage Based Contract Fees

Projected Revenues

- \$10M+ Licence Services
- \$20M+ B2C Patient/Insurance

SUCCESS IS A JOURNEY

KEY GOALS

CURRENT RUNWAY

We will focus on a roll-out by region, national, and international markets.

Q4 2026

Secure 10 regional LOI/Pilots and flagship transplant center licenses.

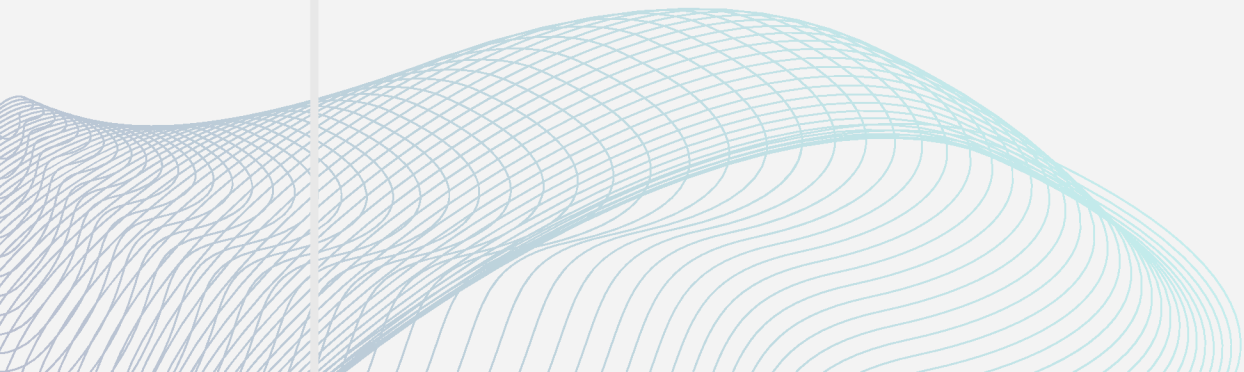

Q4 2032

Achieve 5% market share and 35% expansion revenue via pilots, sales, and international pilots.

Q4 2028

Significantly improve survival outcomes for high-risk patients.

THE CRISIS

THE CURRENT ECOSYSTEM

THE SYSTEM IS FRAGMENTED, UNEVEN, AND
STILL UNDERGOING MODERNIZATION.

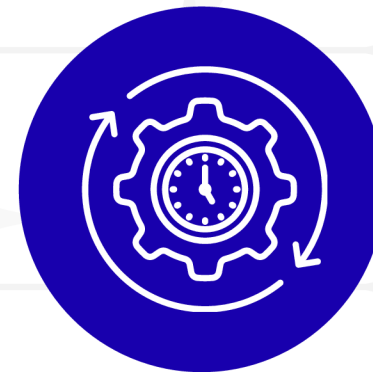

PATIENT JOURNEY

- 100,000+ people are waiting for life-saving organ donations.

- Organ becomes available, triggering a chain of events involving multiple players.

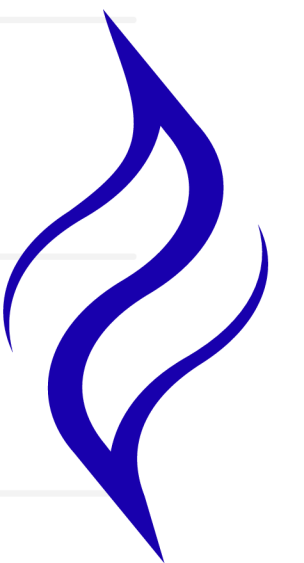

- Patient must wait for phone call
- Patient has exactly 4 hours to reach the OR.

- Surgery is a success, but the cure introduces a permanent, expensive new lifestyle.

- Life-long pill regimen after surgery
- Life-long treatment for organ rejection

THE MARKET

COMPETITOR ANALYSIS

**Unlike competitors, we offer...**

- Real-time clinical decision support
- Data-driven analysis
- Clinical Insight to Prevent Errors
- Documentation Accuracy
- Improve Organ Non-use reduction
- Integration into new systems

- **Institutional Incumbency vs. Technical Debt:** UNOs benefits from deep network lock-in and decades of integration with the U.S. transplant ecosystem.

- **Federal Modernization Mandate:** Existing federal contractors utilize outdated, fragmented technology. The federal government is mandating the replacement of systems.

- **Advanced Technological Advantage:** New competitors deploy cloud-native, multi-vendor platforms leveraging AI/ML

OUR EDGE

KEY DIFFERENTIATORS

User Benefits

- Increased Access to Life-Saving Organs
- Reduced Risk of Organ Rejection
- Shorter Hospital Stays/Fewer Complications
- Human Oversight-Transparency in listing

Use Cases

- Chronic Disease Monitoring
- Optimal Donor-Recipient Matching
- Personalized Post-Transplant Care
- Consumer/Patient Engagement

Solutions

- A.I. Governance & Compliance
- Optimized Streamlined operations
- Transformative Change in Industry
- HIPPA, BAAS, PHI Handling

CHANGE AGENTS

GO-TO-MARKET STRATEGY

Engage B2B, B2C, key medical, and federal partners to drive adoption.

Reach 75+ licensed transplant centers, regional rollout

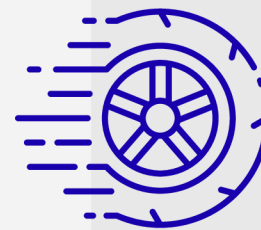

Engagement with Federal, Local, and International OPOS, OPTNs

Market to multi region, national service providers

TRACTION

WE ARE BUILDING NETWORKS

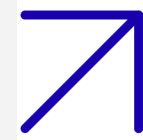

- SBA 8(a) HRSA Engagement
- Pilot Conversations with OPOS, OPTNS, and Hospitals
- Presented to Congressional Liaisons
- Organized the Advisory Board of Doctors
- Established Relationships with OPOs and OPTNs

WORK FLOW

HOW IT WORKS

PRODUCT OVERVIEW

A robust, in-depth, and streamlined platform that will be built with medical expertise.

EXPERIENCE

A modern, transparent interface specific for each type of user

Unify patients, providers, and regulators on a modern platform.

Experience working with Medical Providers

COMPETITIVE EDGE

Driven by personal experience and clinical insight.

Advanced AI innovation, medical expertise, and lived transplant experience.

International Insight Experience

WHAT'S OUR MARKET APPROACH?

We are operating in a once-in-decade structural reset of US organ transplant logistics and governance.

15 BILLION

Global market share is \$15 billion. With a projected growth to **30 billion** over the next decade. *Fortune Business Insights*

5%

The project aims for a 3% market share in the U.S. and 2% globally.

10%

Humanitarian Goal: 10% increase in productivity will reduce OPTN wait times over five years.

UNTAPPED MARKET POTENTIAL

MARKET OPPORTUNITY

- **TAM: \$15 Billion** A multi-billion dollar global market spanning organ disease management, transplant tech, and clinical logistics.
- **SAM: \$3 Billion.** U.S. market for OPO digital infrastructure.
- **SOM: \$150 Million** (5% of SAM). Capturing the infrastructure of America's top 50 transplant hospitals and 20 major OPOs within 5 years.
- **Value monetization:** \$750K–\$1.5M per center, in fees and an annual federal revenue stream.

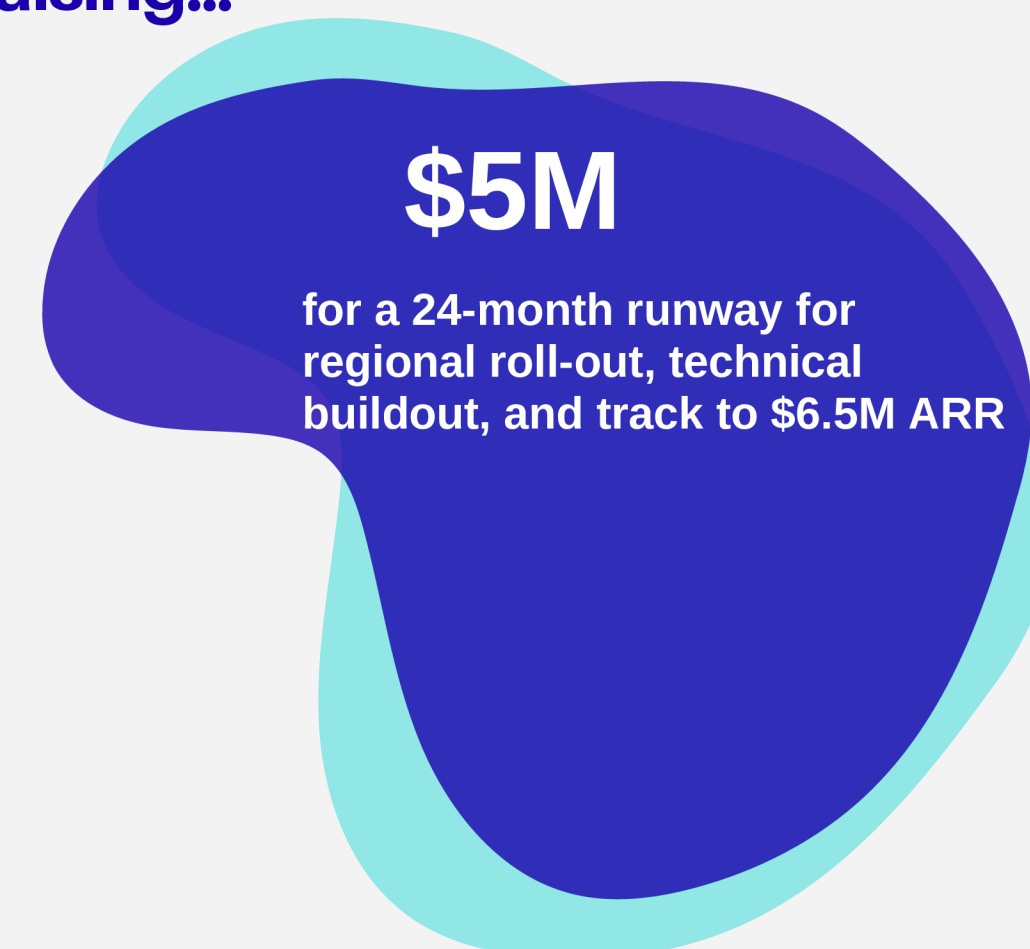

24 MONTH RUNWAY

What we're raising...

OUR TEAM

MANAGEMENT & ADVISORS

Michael Thomas-CEO/Founder

- Leader in Project Management, Vendor Management, Business Development
- 15 years of experience working with federal agencies and federal compliance
- Knowledge of HIPAA, healthcare interoperability, clinical workflows, and healthcare cybersecurity.
- Kidney Transplant Candidate

Dr. Nicole Ali

- Department of Medicine at NYU Grossman School of Medicine
- Medical Director, Kidney Transplant Program
- Medical Director, Kidney and Pancreas Transplant Outreach
- American Board of Internal Medicine (Nephrology)
- First Gene-Edited Pig Kidney Xeno Transplant Trial

Dr. Sherla Sealey, CRNP, MS

- Medical Service Nursing Award
- Johns Hopkins Hospital
- Head of Dialysis, USVI Regional Hospital
- Over a decade experience in managing Chronic Diseases
- Board Certification

Dr. Danillelle Greene DDS

- Fulbright Scholar
- Oral Specialist for Organ Transplant
- Board Certified in Dentistry
- Federal and Local Contract Management

TEAM HIGHLIGHTS

Our team includes professionals with experience...

- Deep Transplant & Regulatory DNA
- World-Class Medical Backing:
- AI & Tech Builders
- Health & Tech Compliance
- Commercial & Government Traction:
- Federal & Multi-Region Scale
- Certifications in Federal, Local, and Medical Industries
